

LegalEase: AI Powered Document Generator

Brainstorming & Ideation Phase:

Objective: To identify a real-world problem and propose an AI solution.

Activities: Discussed problems faced by common people with legal documents. Found that 90% of people sign rental agreements without understanding them. Brainstormed the idea of using Generative AI (Google Gemini) to simplify legal language.

Outcome: Finalized the idea - An AI tool that can Summarize, Explain, and Generate legal documents.

Tools Used: Mind mapping, Group discussion.
