

## **Project Design Phase:**

1. System Architecture: 3-Tier Architecture
2. UI Layer (Streamlit) -> Business Logic (Python) -> AI Layer (Gemini 2.5 Flash API)
3. Workflow Design: User uploads PDF -> 2. PyMuPDF extracts text -> 3. Text + Prompt sent to Gemini ->
4. Gemini returns simplified summary -> 5. Display on UI
5. For Generation: User Form (Name, Date, Rent) -> Prompt Engineering -> Gemini generates formal draft -> DOCX/PDF download
6. UI Design: Sidebar - Summarize, Explain Clause, Generate Document. Main Area - File uploader and Result display.
