

Project Development Phase:

Environment: VS Code, Python 3.11

Implementation Steps: `pip install -r requirements.txt`
`pip install google-generativeai`
Configure API: `genai.configure(api_key='YOUR_KEY')`
Model used: `model = genai.GenerativeModel('gemini-2.5-flash')`
Key Functions: `extract_text_from_pdf(pdf_file)`, `summarize_with_gemini(text)`, `generate_legal_doc(form_data)`
Streamlit components: `st.file_uploader`, `st.download_button`

Challenges Faced: Error 'The Gemini library is not installed' -> Solved by installing in correct virtual environment.
